TRONG PHAN

SOFTWARE ENGINEER

Lexington, KY +1 (859) 705 1502 phanductrong1008@gmail.com
LinkedIn: https://www.linkedin.com/in/pndtr/ | Portfolio: https://pndtr.onrender.com

Software Engineer with over three years of experience developing scalable web applications and B2B SaaS platforms. Skilled in React, Angular, TypeScript, Node.js, PostgreSQL, and AWS, with expertise in API design, database architecture, and performance optimization. Actively exploring AI engineering and leveraging AI-powered tools to improve development efficiency.

EDUCATION

Bachelor of Computer and Information Sciences (International Program)

2019-2023

Auckland University of Technology (AUT) | University of Science (HCMUS)
GPA: 3.72/4.0 | 50% merit-based entrance scholarship

View Diploma

WORK EXPERIENCE

Full-Stack Developer | Random Order

Jun 2026 – Present

Los Angeles, CA (Remote)

Project: QuickTouch

A B2B healthcare SaaS platform for managing medical device catalogs, inventory, and hospital product evaluation workflows

- Delivered end-to-end features for a multi-tenant healthcare SaaS platform using Auth0, React, TypeScript, Hono, PostgreSQL, and Drizzle ORM, gaining hands-on experience in full-stack architecture, API design, and database modeling.
- Built and enhanced core business modules, including CRM, product catalog, inventory management, and Value Analysis Committee (VAC) tracking, translating complex healthcare requirements into scalable, user-friendly solutions.
- Designed secure backend APIs and authorization workflows, implementing role-based access control (RBAC), organization-level data isolation, and user membership management to support multi-tenant environments.
- Improved data loading by eliminating unnecessary sequential requests, compressing responses, and optimizing image delivery.
- Leveraged Claude Code AI in daily development workflows to accelerate implementation, code refactoring, debugging, and test generation, reducing development time while maintaining code quality through code reviews and automated testing.
- Collaborated with cross-functional teams to deliver production-ready features and strengthen expertise in system design, cloud infrastructure, and AI-assisted development.

| Tech Stack: React, TypeScript, Node.js, Hono, PostgreSQL, Drizzle ORM, Redis, WebSockets, AWS

Full-Stack Developer | Rita Vo Group

Apr 2025 - Apr 2026

Ho Chi Minh City, Vietnam | Task management and collaboration

Project: Kompact Task Management

Enterprise collaboration platform supporting task tracking and real-time communication.

- Developed and maintained a full-stack task management and collaboration system supporting task tracking, analytics dashboards, and real-time communication.
- Built high-quality, scalable Vue.js frontend interfaces with pixel-accurate implementation from Figma and optimized rendering performance across browsers.
- Designed and implemented RESTful APIs for core domains including tasks, projects, users, and role-based access control; architected Express.js backend services with modular, scalable design patterns to improve maintainability and extensibility.

- Implemented a real-time chat module enabling seamless in-app communication and collaboration between teams.
- Optimized data flow between frontend and backend, improving responsiveness and user experience in task-heavy workflows.
- Collaborated with cross-functional teams including Business Analysts, Designers, and Engineers to define requirements, estimate effort, and deliver features in Agile sprints.

| Tech Stack: Vue.js, Vuex, Express.js, MongoDB

WORK EXPERIENCE

Full-stack Developer | Zodinet Technology

Apr 2023 - Dec 2024

Ho Chi Minh City, Vietnam (On-site)

Project: Jupiter – Restaff (HRM Platform)

- Built and maintained scalable Angular features, including the Leave Transfer module, while refactoring legacy code to improve system stability and UI performance.
- Developed C#/.NET APIs and collaborated with backend teams to ensure seamless data integration and a consistent UI/UX across the HRM system.

| Tech Stack: Typescript, Angular, NgRx, SCSS, C#, .NET, SQL Server

Project: Times - Jobframe (Workforce Management)

- Optimized API response times by integrating Redis caching, ensuring stable performance during high-traffic periods.
- Implemented complex organizational structures using JanusGraph to enable efficient querying of relationship data.
- Contributed to the full Agile lifecycle, from estimating tasks to delivering iterative features on schedule.

| Tech Stack: Typescript, Angular, RxJS, SCSS, Node.js, Express.js, Redis, JanusGraph

Team Lead & Backend Developer Intern | Zodinet Internship Program

Feb 2023 - Apr 2023

Ho Chi Minh City, Vietnam (On-site)

- Led a team of four developers, managed task distribution, and ensured 100% on-time delivery of sprint goals.
- Built the backend using NestJS and TypeORM, applying Clean Architecture principles for better scalability.
- Conducted rigorous code reviews and mentored team members to maintain consistent code

| Tech Stack: NestJS, TypeORM, PostgreSQL, React, Next.js, Tailwind CSS, Cloudinary

TECHNICAL SKILLS

Languages	Typescript/JavaScript, C#
Frontend	React, Vue.js, Angular, Tailwind, SCSS, RxJS, Tanstack Query
Backend	Node.js (Hono, Express, NestJS), .NET Core, REST APIs
Databases	PostgreSQL, Redis, MongoDB, SQL Server, JanusGraph
Cloud & Delivery	AWS, GitHub Actions, Docker, Git
Additional	WebSockets, TypeORM, Entity Framework

ADDITIONAL INFORMATION

Languages: English (IELTS 6.5), Vietnamese (Native)
Availability: Open to full-time opportunities
Work Authorization: U.S. Permanent Resident (I-551) | No sponsorship required.
