Summary

A full-stack web developer with almost 3 years of experience in front-end and back-end technologies. Passionate about learning new technologies, building scalable web applications, and collaborating with teams. Eager to grow skills and contribute to company success.

Education

International Program: Bachelor of Computer and Information Sciences AUT

University of Science (HCMUS) and Auckland University of Technology (New Zealand)

2019 – 2023

- **Classification:** Computer Science.
- **GPA: 3.72**/4.0

English Qualification

- **Level:** Proficient (**IELTS 6.5**)

Work experience

❖ **RitaVõ Group:**

June 2025 – April 2026

Project: Kompact Task Management

Kompact Task Management is an internal task management and collaboration platform designed to streamline daily workflows within the company. The system includes task tracking, dashboard analytics, and a real-time group chat module that enables direct communication and collaboration between employees inside the application.

- **Role:** Fullstack Developer**.**
- **Responsibilities:**
    - Developed and maintained frontend features using Vue.js, implementing pixel-accurate UI from Figma designs, ensuring high performance and cross-browser compatibility.
    - Designed, built, and extended RESTful APIs to support core business domains including task management, project management, members management, and role-based authorization.
    - Developed backend services using Express.js, applying a modular and scalable architecture to improve maintainability and future extensibility.
    - Contributed to the development of a real-time group chat module, enabling team collaboration, task-related discussions, and in-app communication across departments.
    - Collaborated closely with Business Analysts, Designer, and Engineers to analyze requirements, estimate tasks, and deliver features on schedule following Agile practices.
- **Technologies:**
    - Frontend: Vuejs, Vuex

- Backend: Express.js
- Database: MongoDB.

❖ **Team size:** 2 members

❖ Zodinet Technology:

April 2023 – August 2024

Project: Times – Jobframe

Developed a web-based platform for tracking work hours across assignments. It also provides organization, employees, their employee activity logs, and assignments management services for the time manager who has access to the premium version in the system.

- **Role:** Fullstack Developer**.**
- **Responsibilities:**
  - Created UI using Angular, focusing on performance and user experience.
  - Developed a free version for users to track assignment times and manage their activity logs.
  - Developed business version for time managers to administrate their employee timesheet, organizations information, persons, assignments, and work time models
  - Implemented caching techniques to reduce page load times.
  - Developed RESTful APIs using Express.js and Node.js.
- **Technologies:**
  - Frontend: Angular, RxJS, SCSS
  - Backend: Express.js, Gremlin, Redis
  - Database: JanusGraph.
  - Agile methodology.
- **Team size:** 4 members

August 2024 – December 2024

Project: Jupiter - Restaff

Maintained and developed modules for a web-based human resources management platform and enhanced system functionality. Focused on implementing new features and supporting ongoing system improvements.

- **Role:** Frontend Developer.
- **Responsibilities:**
  - Created UI using Angular, focusing on performance and user experience.
  - Maintained existing features to ensure system stability and efficiency.
  - Developed the leave transfer module.
  - Developed RESTful APIs using DotNet.
- **Technologies:**
  - Frontend: Angular, NgRx, NgPrime, SCSS
  - Backend: C#, DotNet.
  - Database: Microsoft SQL Server.
  - Agile methodology.
- **Team size:** 2 members.

❖ Zodinet's Internship Program

February 2023 – April 2023

Project: Dating App

Developed a web-based platform for users to connect to their perfect match. Featuring personalized profiles, real-time chat, and finding the nearest friends allows users to create profiles according to personal preferences and communicate with their matched friends.

- **Role:** Team leader & Backend Developer.
- **Responsibilities:**
  - Developed RESTful APIs using NestJS and Node.js.
  - Participated in code reviews and provided feedback to improve the quality with mentors.
  - Coordinated team activities, ensuring smooth collaboration and maintaining high team performance.
  - Managed tasks and ensured the team consistently delivered new features and improvements in each sprint, as agreed with mentors.
  - Collaborated closely with front-end developers to integrate back-end APIs, ensuring a seamless user experience.
- **Technologies:**
  - Frontend: React.js, Next.js, Tailwind CSS, Ant Design, SCSS, Redux.
  - Backend: Nestjs, TypeORM.
  - Database: PostgreSQL.
  - Images management: Cloudinary
  - Agile methodology.
- **Team size:** 4 members
